### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Applicant's election without traverse of Species III, claims 1, 2, 6, 8, and 9, in the reply filed on 7/11/07 is acknowledged.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 6, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishimusa et al. (JP 07-155410) in view of Soracco (USPN 6743118).

Regarding claim 1, Nishimusa et al. discloses a club head having a face portion, crown portion, heel portion, toe portion, and sole portion wherein at least two portion of the club head is made of dissimilar materials. Nishimusa notes that the club head is made of FRP and metals. One having ordinary skill in the art would have found it obvious to have the club head made of any material so long as the specific gravity gets larger toward the back of the club head. Nishimusa et al. does not disclose the face pace being separately attached. Soracco discloses a club head having a face plate being separately attached to the club head and integrally formed. One having ordinary skill in the art would have found it obvious to have the face plate attached the in above manner because it is a common form of attaching the face plate. Soracco also has a face portion in which the face plate is attached that is 0.20 to 1.50 inches from the attachment point of the body.

Regarding claim 2 and 9, Nishimusa et al. discloses the joining member made of FRP and overlapping the first and second members respectively and can also be attached using adhesive (See Figure 4).

Regarding claim 6, Nishimusa et al. discloses the dissimilar materials being titanium, aluminum, stainless steel, and magnesium.

### ***Allowable Subject Matter***

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***
